PROFESSIONAL SUMMARY

Final-year B.E. student in AI & ML (CGPA 8.08) with a deployed end-to-end ML web application, hands-on internship experience at TheSmartBridge, and certifications in Oracle Cloud, IBM AI, and Databricks GenAI. Proficient in Python, Scikit-learn, Flask, and full ML workflows from data preprocessing and feature engineering through model training and cloud deployment. Seeking an entry-level ML Engineer or ML Intern role to contribute to real-world AI systems.

TECHNICAL SKILLS

Languages: Python (Primary), JavaScript, C++, SQL

ML / Data: Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn, EDA, Feature Engineering, Predictive Modeling, Supervised Learning, Model Evaluation, NLP, Deep Learning, Generative AI

Web / Cloud: Flask, REST APIs, Render Cloud, Oracle Cloud (OCI), Databricks, HTML/CSS

Tools: Git, GitHub, Jupyter Notebook, VS Code, MongoDB, SQLite, MySQL

WORK EXPERIENCE

Machine Learning Intern — TheSmartBridge

Nov 2025 – Jan 2026

Remote | Hyderabad, Telangana

- Built end-to-end ML workflows on real-world datasets using Python, Pandas, NumPy, and Scikit-learn.
- Applied data preprocessing, feature engineering, and model evaluation (accuracy, precision, recall, F1-score).
- Worked on supervised learning pipelines — classification & regression — and predictive analytics tasks.
- Strengthened collaborative coding and documentation practices in a remote team environment.

PROJECTS

Employee Performance Prediction System [GitHub](#) | [Live Demo](#)

Python | Scikit-learn | Flask | Pandas | NumPy | Render | Git

- Deployed an end-to-end ML web app predicting employee performance from real HR datasets on Render cloud.
- Performed data cleaning, outlier detection, and feature selection to improve model generalization.
- Trained and compared multiple Scikit-learn classifiers; selected best model by F1-score and accuracy.
- Built Flask REST API for real-time predictions; full project lifecycle managed via Git & GitHub.

Restaurant Tips — Business Intelligence Analysis [GitHub](#)

Python | OOP | EDA | Map / Filter / Reduce | File I/O

- Built full analysis pipeline in pure Python on 244-row real-world dataset; engineered tip_pct feature column.
- Uncovered 3 actionable business insights using OOP class design, dictionaries, loops, and functional programming.
- Published on GitHub with structured README, reproducible steps, and ASCII visual dashboard output.

EDUCATION

Lords Institute of Engineering & Technology — Osmania University

2022 – 2026

B.E. — Artificial Intelligence & Machine Learning | CGPA: 8.08 / 10 | Hyderabad, India

Sri Chaitanya Junior College, Hyder Nagar

2019 – 2021

Intermediate (Class XII) | Aggregate: 84%

CERTIFICATIONS

- Oracle Cloud Infrastructure (OCI) Foundations Associate — Cloud computing, OCI services, security, deployment
- IBM Artificial Intelligence Fundamentals — Core AI/ML concepts, supervised learning, real-world AI applications
- Databricks Accredited Generative AI Fundamentals — LLMs, GenAI use cases, prompt engineering on data platforms

CORE COMPETENCIES

Machine Learning • Python • Data Preprocessing • EDA • Feature Engineering • Predictive Modeling • Scikit-learn • Flask • Supervised Learning • Model Evaluation • NumPy • Pandas • Git & GitHub • Cloud Deployment • REST APIs • OOP • Deep Learning • NLP • Generative AI • Oracle Cloud • Databricks • Remote Work
